

EXTREME™ SERIES SECTIONAL & 1024 SERIES DOORS

Fire Station Solutions

MILLISECONDS MATTER

Milliseconds matter and lives are at risk during a fire. A non-functioning fire station door that complicates exiting in an emergency poses a large issue. If you're a fire chief, you already know about the importance of fire station maintenance, from dorm and day rooms to apparatus and vehicle maintenance bays.

HIGH PERFORMANCE DOORS FOR HIGH PERFORMANCE FIRE STATIONS

Our Extreme® 1024 High Performance Door is three times faster than a regular service door at 24 inches per second and can be retrofit easily into existing applications. One or two-way visibility windows are also available, along with a million lifetime cycles and powder-coating options in more than 180 colors. Insulated models to keep the station regulated.

Our Extreme™ Series Sectional Door features an average opening speed of 24 in per second. That is three times faster* on opening and two times faster on closing than a traditional sectional door. Faster closing speeds to ensure the station is secure when leaving the building in a rush. It offers enhanced safety measures and robust hardware to extend the life of the door components. Insulated options available with a 18.4 R Value. This door comes standard with the direct drive LiftMaster® operator that offers 50,000 cycles standard over a two-year warranty period.

*when compared to a 10'x10' door with a Logic 5.0™ operator set to an average of 8in/sec

**when compared to a standard operator witset to an average of 8" per second

LET OUR EXTREME SERIES DOORS TAKE CARE OF YOUR STATION
