OF THE YEAR

HIGH-VALUE MERCHANDISE- HIGH-VALUE SECURITY

In the cannabis industry, protecting your staff and facility doesn't have to translate into an intimidating exterior or a pretty storefront that lacks security. Enter StoreDefender™—engineered to protect against vandalism, theft and unwanted building intrusions. StoreDefender can be retrofitted into almost any opening and can be mounted to a building's exterior to protect glass storefronts. StoreDefender is available in more than 180 powder coat colors to blend seamlessly into the building. It doesn't just look great; it can handle whatever life throws at it, too.

PROTECTION FOR VALUABLE STAFF AND ASSETS

StoreDefender offers protection during daily use and the unexpected. It required 4,500 lbs. of force to lift the door even 3 inches during testing, and features a rigid 6-inch heavy-duty bottom bar. StoreDefender's thick curtain, tamper resistant fasteners, and continuous wind locks keep the curtain in place under duress.
