

KEEP YOUR ROLLING DOOR LOOKING NEW, CYCLE AFTER CYCLE

GALVANEX® ULTRA™ SPECTRASHIELD® ULTRA™ & CYCLESIELD® ULTRA™ POWDER COAT FINISH

TEXTURED CLEAR COAT FINISH

A rolling door works hard, and that takes its toll on a standard powder coat finish. To keep your door looking like it did the day it was installed, upgrade your standard finish with Galvanex® Ultra™, SpectraShield® Ultra™ or CycleShield® Ultra™.

These polyester-based, clear, powder coat finishes afford improved durability against deterioration. The wear-resistant formula provides a protective, textured, top coat that alleviates marring of the curtain during everyday use. As an added bonus, it offers increased protection to the curtain in a corrosive environment.

Galvanex Ultra & SpectraShield Ultra are Available on Service Door, Thermiser®, Thermiser Max®, Counter Door, Fire Rated Counter Door, Fire Door, Wind-Master® Door, Exam Room Counter Door and Insulated Counter Door. CycleShield Ultra is available on Extreme® 300 Series Door and Extreme® 1024 Door.

WARRANTY

5 years (against fading, cracking, blistering, flaking or peeling) and 2 years or 50,000 cycles (against normal abrasion and scratching from cycling); whichever comes first.
