

# EXTREME<sup>®</sup> 300 SERIES MICROCOIL<sup>®</sup> GRILLE

Model EPG324C

## ADA COMPLIANCE

The Extreme 300 Series MicroCoil Grille was designed with parking in mind. One of every six accessible parking spaces must be ADA van accessible in a parking garage. Since an ADA van only clears a typical opening of the parking structure by ~14", installing a security grille used to be quite the challenge.

Not anymore. The MicroCoil Grille easily fits in

that ~14", allowing ADA vans to enter most existing parking garages with ease. Its patented link system not only coils tighter than any other grille on the market, but also coils quietly – a big benefit for multi-use spaces that combine parking, retail, and residential use. Parking garage managers no longer have to compromise security for ADA compliance!
