

STEELWEAVE® METAL MESH GRILLE

Models EAG10C, EAG10V, EAG10S

PROTECT AGAINST THEFT

A retail storefront is a great way to display merchandise and generate interest. But the same glass windows and doors that display the merchandise, can also leave the store vulnerable to smash-and-grab theft or vandalism. The SteelWeave Metal Mesh Grille is the perfect added security – it can be installed behind the glass and rolled up or down as needed.

When the grille is in the open position, it is undetected by shoppers. When it is in the closed position it not only provides added security, it also adds a touch of elegance while the open design of the type 316 stainless steel mesh grille allows those passing by to window shop.

ELEGANT SECURITY FOR HIGH END RETAIL
