

# LED LIGHT KIT

For Standard and High Performance Doors and Grilles

## ILLUMINATED VISUAL SIGNAL

LED Light Kit is a simple visual notification for monitoring door position.

Ideal for fire and other emergency services, parking applications, and warehouses, this option uses a bright, vibrant, visual signal to alert drivers of whether a commercial door or grille is open or closed. This can help effectively decrease vehicle and forklift damage to the door and surrounding property, minimizing downtime, expensive repairs or ancillary security costs.

### LED LIGHT KIT:

- ▶ Available in 5', 10' or 15' versions to be seen at different heights when in higher commercial vehicles or in rear-view mirrors
- ▶ LED light indicators to monitor door position; LED's remain a steady red all the time the unit is in the closed position, but flash red when door is in motion; when door is open, the LED's are solid green; when LED's are flashing white, it indicates a safety/photo eye fail
- ▶ Durable, IP68 rated, marine-grade wiring and stainless steel hardware ensure long life during harsh conditions
- ▶ Task indicators notify of loss of power to the operator and failures to door safety equipment
- ▶ Red LEDs illuminate work areas, preserving night vision and reducing the need for white lights
- ▶ Can be retro-fit to an existing door
- ▶ Compatible with most commercial doors and grilles\*

\*LED Light Kit is available for all standard and high performance rolling doors, grilles, and counter doors, excluding fire and smoke-rated products.
