

# SCREENGARD™

## Perforated Slats

ScreenGard Perforated slats are the best of both worlds - they provide the security of a rolling service door and the visibility and ventilation of a grille.

This is ideal in applications that require the rolling door to remain closed, but airflow must still be maintained throughout the building.

ScreenGard perforated slats are available in Galvanized Steel and Aluminum.

### GALVANIZED STEEL

### ALUMINUM

Steel		Aluminum
20 Gauge	<b>Service Door Slat Gauge</b>	16 Gauge
22 Gauge	<b>Counter Door Slat Gauge</b>	N/A
Perforated Galvanized	<b>Slat Material</b>	Perforated Clear Anodized
22%	<b>Open Space*</b>	25%
Yes	<b>Every Slat</b>	Yes
Yes	<b>Alternating Slats</b>	Yes

\*Open space percentage that is provided applies to a door that has every slat perforated. Alternating slats will decrease the overall airflow by approximately half.
