

SCREENGARD™

Perforated Slats

ScreenGard Perforated slats are the best of both worlds - they provide the security of a rolling service door and the visibility and ventilation of a grille.

This is ideal in applications that require the rolling door to remain closed, but airflow must still be maintained throughout the building.

ScreenGard perforated slats are available in Galvanized Steel and Aluminum.

GALVANIZED STEEL

ALUMINUM

Steel		Aluminum
20 Gauge	Service Door Slat Gauge	16 Gauge
22 Gauge	Counter Door Slat Gauge	N/A
Perforated Galvanized	Slat Material	Perforated Clear Anodized
22%	Open Space*	25%
Yes	Every Slat	Yes
Yes	Alternating Slats	Yes

*Open space percentage that is provided applies to a door that has every slat perforated. Alternating slats will decrease the overall airflow by approximately half.
