

DEFENSELITE™

Window Protection and Security

PROTECT YOUR PROFITS

CHOOSE **DEFENSELITE™** TO PROTECT YOUR BUSINESS

DEFENSELITE addresses a building's most vulnerable area - glass. While glass is easily breached, our retro-fit DefenseLite panels are not. 250 times stronger than glass, DefenseLite panels are clear and custom engineered to fit over any window or door opening.

NO ENTRY, NO HARM STOP SMASH AND GRAB

DEFENSELITE systems currently protect retail storefronts throughout the US. It exists to keep intruders out and has in all cases when put to the test. DefenseLite is virtually invisible and designed to blend seamlessly into any existing window or door frame configuration.

HOW IT WORKS

DEFENSELITE panels bond over existing windows and doors using our Super Bond (DSB) anchoring system. A custom frame creates an air space between the panel and the glass. The air space insulates, reducing HVAC costs. DefenseLite Super Bond (DSB) anchoring system eliminates the need for rivets, bolts and screws. There are no mechanical attachments or moving pieces. Installation is fast, quiet, economical and does not void any warranties. DefenseLite reduces street noise and improves interior environments.
